The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply					
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.  - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.  - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.  - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

## Election/Restrictions

This application contains claims directed to the following patentably distinct species of the claimed invention:

- A) A method wherein a sensor for measuring blood pressure is provided
- B) A method wherein a sensor for measuring blood flow is provided

The applicants are required under 35 U.S.C. 121 to elect a single disclosed species between species A and B for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1 and 18-20 are generic.

This application contains claims directed to the following patentably distinct subspecies of species A of the claimed invention:

- i) A method wherein the sensor measures vascular pressure
- ii) A method wherein the sensor measures cardiac pressure

If the applicants elect species A from the above election of species, the applicants are further required under 35 U.S.C. 121 to elect a single disclosed subspecies between subspecies i and ii for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1, 18-20, and 23 are generic.

This application contains claims directed to the following patentably distinct species of the claimed invention:

- C) A method wherein the sensor is positioned on an artery
- D) A method wherein the sensor is positioned on a vein
- E) A method wherein the sensor is positioned in or on the heart
- F) A method wherein the sensor is positioned adjacent vascularized tissue

The applicants are required under 35 U.S.C. 121 to elect a single disclosed species between species C-F for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.

This application contains claims directed to the following patentably distinct species of the claimed invention:

- G) A method wherein the delivered stimulus is electrical
- H) A method wherein the delivered stimulus is pharmacological

The applicants are required under 35 U.S.C. 121 to elect a single disclosed species between species G and H for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 18 and 32 are generic.

This application contains claims directed to the following patentably distinct species of the claimed invention:

Art Unit: 3736

- I) A method wherein blood perfusion is detected in the patient's chest
- J) A method wherein blood perfusion is detected in the patient's head or neck

The applicants are required under 35 U.S.C. 121 to elect a single disclosed species between species I and J for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 18-20, 28, and 29 are generic.

The applicants are advised that a reply to these requirements must include an identification of each species that is elected consonant with each requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon allowance of a generic claim, the applicants will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, the applicants must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should the applicants traverse on the ground that the species are not patentably distinct, the applicants should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over

Page 5

the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

The applicants are advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Patricia C. Mallari whose telephone number is (571) 272-4729. The examiner can normally be reached on Monday-Friday 10:00 am-6:30 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Max Hindenburg can be reached on (571) 272-4726. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Art Unit: 3736

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
